

Antwerp, October 16<sup>th</sup> 2023

## Relocation of our Antwerp calibration labs scheduled for December 2023

Dear client,

In line with our quality plans, accreditations and Business Continuity planning, we take pleasure in informing you that our facility in Antwerp, including all of our laboratories, will be relocating to a new site in December.

Please note that **starting from December 11th, the NEW ADDRESS** for shipping instruments and mailing purposes will be:

Nijverheidsstraat 70  
2160 Wommelgem (Antwerp)  
Belgium

### What does this move mean for you?

- Your Trescal contact person remains unchanged.
- For those clients that do not make use of our own logistics services for collection and delivery, but send or collect instruments directly at our lab in Antwerp (our Benelux headquarter), the delivery and pick-up address changes.

- **Until 8 December 2023, you are welcome at our current address:**

Vosstraat 200  
2600 Antwerp (Berchem)  
Belgium

- **From 11 December, come visit us at the new site:**

Nijverheidsstraat 70  
2160 Wommelgem (Antwerp)  
Belgium

### Why is Trescal moving?

- Because we need more space to house our continuously growing services and equipment. In the fields of calibration, 3D-measurement, clean room validation and qualification we serve many customers active in the aerospace, automotive, pharmaceutical, chemical, energy, electronics, manufacturing and telecommunications sectors. For these clients in Belgium, the Netherlands, and the EMEA region, our skilled technicians carry out an impressive half million interventions each year.
- Because we need room to expand and grow, to unburden our customers in other fields of metrology as well, such as Electricity, Pressure, Temperature and Moisture, Dimensional, Mechanical, Optical and Physical 3D-measurement, Volume, Mass, Flow, Particle counting, Anemometry, etc.

- Because we take pride in our ever-growing accreditations, which come with added responsibilities and requirements. We are BELAC-accredited under Calibration ISO/IEC 17025 for calibration & testing, inspection under legal metrology as per ISO/IEC 17020, FDA CFR 21 PART 11 Compliance, DAFRS / NIST Compliance ... we have accreditations in 15 domains (totaling more than 50 pages of accreditations!).
- To expand the pool of instruments and measurement kits we manage for our customers.
- To significantly reduce our carbon footprint.
- To provide more space and streamline the logistics chain; the back and forth of instruments, whether it is through direct shipping or via our own convenient delivery hubs.
- To contribute to a conducive and safe workplace for our 400 employees (the end of 2023). We aim to foster the professional growth and development of our technicians and engineers, while ensuring their safety and enhancing productivity. Our focus is on achieving optimal efficiency, lead times and quality.

## Guaranteed continuity of our services

- To help guarantee promised turnaround times, our laboratories in Antwerp, Hengelo, Zoetermeer, Louvain-La-Neuve, Wellin, Eindhoven, Sint-Renelde/Saintes, and Lier will remain operational throughout the move. Our on-site technicians will also be available. Additionally, our international network of laboratories in France, Spain, and the UK will actively provide support during this transitional period, ensuring a smooth process.
- Our platforms for instrument and certificate management and our instrument (re)call services (Trescal Vision and Trescal View) will remain accessible and operational throughout the move without interruption. We will carefully move, lab by lab, ensuring the utmost care for our own resources and maintaining strict standards. We will also relocate our customers' instruments with the highest level of precision, care, and control.
- Would you like to outsource additional work, services or follow-up, whether under accreditation or not, to Trescal? We remain at your service. **Contact us on +32 (0)3 542 62 90 or at [sales.benelux@trescal.com](mailto:sales.benelux@trescal.com)**

Trescal continues to contribute to the future of suppliers and producers in the manufacturing industry and life sciences in Belgium, the Netherlands, and beyond. To do so, we are increasingly expanding our competences, services, capacity and solutions to relieve you of worries and contribute to your quality and success.

We appreciate your trust and look forward to serving you again from our new location.

Kind regards,

**Guy De Decker**  
Lab manager BE  
Trescal Antwerp

**Tony Van Mirlo,**
